1. Purpose

Gunning Wind Farm is an Australian subsidiary of Acciona Energy Global SA and Acciona International SA (Acciona Energy). This Pollution Incident Response Management Plan (PIRMP) outlines the incident response and authority notification process in the event of a pollution incident at Gunning Wind Farm. This plan has been developed in accordance with requirements of the Gunning Wind Farm Environmental Protection License 20440 and requirements of the Protection of the Environment Operations (POEO) Act and Regulations.

2. Scope

This PIRMP is limited to Gunning Wind Farm.

3. Definitions

Term	Definition
Authorities	Local fire and health services, Council and environment and safety regulators.
Community	Local landowner(s).
Pollution Incident	An incident during which there is a fire, or a spill, or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur.
Risk Assessment	Evaluate the likelihood and consequence of environmental hazards.

4. Risk Assessment

Gunning Wind Farm evaluates hazards through a risk register and regularly conducts environmental audits and inspections in accordance with Acciona Energy's HSE Risk Management Procedure.

Acciona has controls to prevent and mitigate pollution incidents such as spills. With controls implemented the likelihood of a pollution incident such as those listed below are unlikely, of low severity and localised:

- Spills during vehicle / generator refuel or maintenance
- Leak or spill of low volume fuels, oils and chemicals used for maintenance
- Fire due to combustion of fuels, oils, low volume chemicals or electrical components.

5. Pollution Incident Response

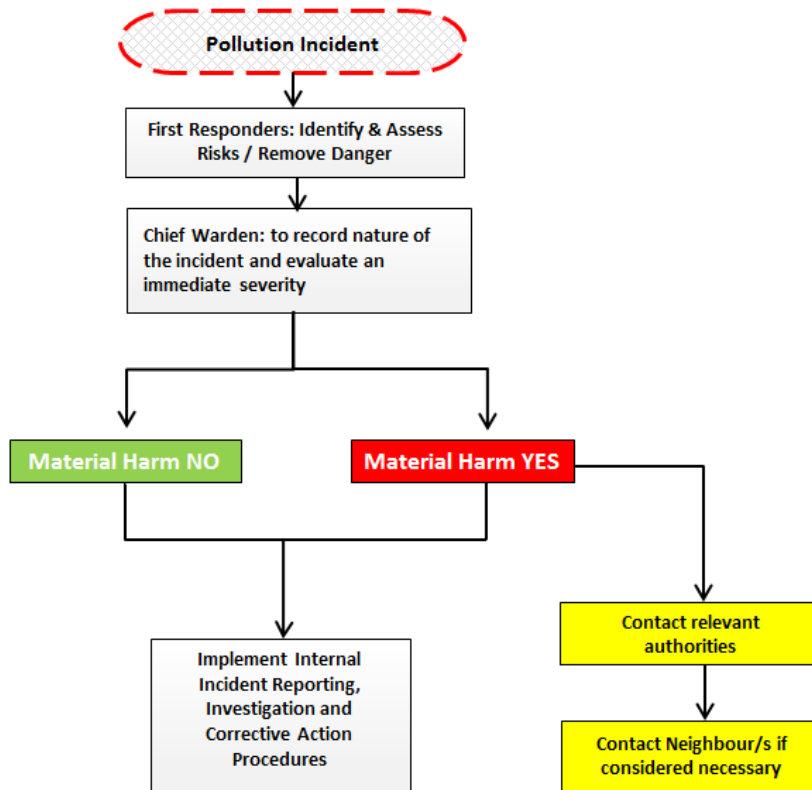

In the event of a pollution incident the following steps are to be followed:

1. Immediately engage in emergency response / containment measures as per procedures documented in the site Emergency Response Plan
2. Immediately notify the relevant authorities outlined in the 'pollution incident notification' table
3. Consider the nature of the incident and assess the requirement to contact site neighbours.

6. Emergency Response Plan

ACCIONA has implemented a detailed emergency response plan which is reviewed and tested on a regular basis.

Pollution Incident Notification Process

7. Notifying Authorities

The following authorities are to be notified in order of priority.

Authority	Telephone Number
Site Manager – Gunning Wind Farm	0400 956 724
NSW EPA	131 555
<u>Health Services</u>	
- Goulburn Base Hospital	02 4827 3111
- Crookwell District Hospital	02 4832 1300
SafeWork NSW	13 10 50
Local Council – Upper Lachlan Shire Council	02 4830 1000
<u>Fire Authorities</u>	
- Southern Tablelands Zone Rural Fire District	02 4822 2900
- Goulburn Fire & Rescue	02 4822 1608

8. Training

Site personnel will be consulted on the content of this PIRMP at least annually and records of consultation in the form of toolbox shall be retained.

9. Notifying the Community

There is one landowner at the Gunning Wind Farm site location who shall be notified of pollution incidents when necessary.
